

## Special Issue

# Genetic Diversity Assessment and Phenotypic Characterization of Crops

### Message from the Guest Editors

By combining genetic diversity assessment with phenotypic characterization, researchers can better understand the relationship between genotypes and phenotypes, leading to the development of improved crop varieties. This integrated approach allows for the selection of crops with desirable traits, such as high yield, disease resistance, and nutritional quality, contributing to sustainable agriculture and food security. Topics of interest for this Special Issue include, but are not limited to, the following:

- Investigating the role of genetic diversity in crop adaptation to changing environments;
- Utilizing advanced technologies such as genomics and bioinformatics for more accurate and efficient assessment;
- Evaluating the performance of crops under different environmental conditions;
- Assessing the nutritional quality and health benefits of crop varieties;
- Studying the interactions between genotypes and phenotypes;
- Exploring the potential of precision agriculture techniques for phenotypic data collection;
- Integrating phenotypic data with genomic information for a more comprehensive understanding of crop traits.

### Guest Editors

Prof. Dr. Andrijana Rebekić

Faculty of Agrobiotechnical Sciences Osijek, Josip Juraj Strossmayer University of Osijek, Vladimira Preloga 1, 31000 Osijek, Croatia

Dr. Ankica Kondić-Špika

Institute of Field and Vegetable Crops, 21000 Novi Sad, Serbia

### Deadline for manuscript submissions

15 October 2025

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
