Building Resilience Through Sustainable Agri-Food Supply Chains

Message from the Guest Editor

Agri-food supply chains are facing transformative pressures. Solving these challenges demands building sustainable, profitable, resilient, and secure agri-food supply chains. How are agri-food supply chains worldwide adapting their operations and business models to become more productive and less wasteful? How do global economic dynamics impact local agri-food supply chains? Is whole-scale supply-chain transformation required to integrate sustainability principles into corporate strategies and decision-making? What policies should be implemented to create supply chains that are more resilient in the face of unexpected events? How can approaches such as network analysis, nexus perspectives, and system modeling be mobilized to improve conceptual representations of sustainability in agri-food supply chains? How can innovative technologies and data contribute to more sustainable performance, fewer food losses, and less waste? This Special Issue invites submissions addressing these questions or related topics of utmost societal and policy relevance. We welcome qualitative, quantitative, or mixed-method approaches, including original research and reviews.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
