

Special Issue

Advancements in Best Management Practices for Enhancing Soil Health and Water Quality

Message from the Guest Editors

This issue highlights the latest research and technological innovations aimed at improving soil health and water quality in agroecosystems. In exploring a spectrum of practices, from precision agriculture to eco-friendly land management techniques, we seek to establish a framework for sustainable farming that balances productivity with environmental protection. The contributions herein aim to guide land managers to adopt practices that ensure the long-term viability of water and soil resources, thereby fostering a healthier planet for future generations. Areas of interest for this Special Issue include but are not limited to

- Advances in precision agriculture technologies and their impact on soil and water conservation;
- Evaluation of eco-friendly land management techniques for enhancing ecosystem services;
- Innovative strategies for optimizing water usage and quality in agricultural systems;
- The role of sustainable soil management practices in promoting agricultural productivity and environmental health;
- Integration of traditional knowledge into modern technologies to foster sustainable agricultural landscapes.

Both original research and review papers are warmly invited.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
