

## Special Issue

# Advances in High Quality or Value-Added Processing of Fruit and Vegetable

### Message from the Guest Editors

Fruit and vegetables processing is plagued by two main problems: food quality decrease and processing waste pollution with no value-added utilization. Food quality decrease is generally related to processing factors, food raw material properties, storage conditions, etc. Fruit and vegetable processing pollution is due to the various food waste, such as peel, residue, seed, leaf, processing water, etc., which can be developed as nutritional or useful byproducts to meet zero-waste and green process goals. Many studies have focused on these areas, producing useful information, but many aspects remain unsolved due to the vast variety of fruits and vegetables and the different processes for each.

This Special Issue focuses on the quality promotion of fruit and vegetables after processing and the utilization of byproducts to create a clean process. The issue welcomes a broad range of studies related to fruit and vegetable characterization, processing, storage, quality, waste analysis, byproduct utilization, etc. Original research articles and reviews are accepted.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
