

Special Issue

Organic Management Approaches and Practices to Support Sustainable Horticultural and Fruit Plants Production

Message from the Guest Editors

The production of horticultural and fruit plants with environmentally friendly and organic farming approaches is important for social, environmental, and economic sustainability. To achieve these goals, the introduction of innovative and organic management practices can help farmers to reduce chemical inputs, decrease pollution, increase soil and water quality, and improve biodiversity. The aim of this Special Issue is to contribute to the scientific knowledge on the effectiveness of organic management approaches and practices for the sustainable production of horticultural and fruit plants. We encourage the submission of manuscripts focused on organic farming systems for growing fruit crops, smart farming systems for growing fruit crops, crop cultivation under organic management approaches and practices, sustainable agricultural practices of horticultural and fruit crops, cultivation techniques and fruit quality, eco-friendly cultivation and production of fruit crops, controlled environmental conditions and treatments on the development and quality of fruit crops, and research on plant nutrition and antioxidant metabolism of fruit crop production.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
