Conservation Agriculture, an Alternative for Sustainable Farming

Message from the Guest Editors

Conservation agriculture (CA) is an agro-ecological approach that aims to achieve the sustainable and profitable intensification of agricultural systems through the application of three inter-linked principles, based on locally-formulated practices: minimal soil disturbance, permanent soil cover, and crop rotation. The obstacles to the adoption of CA farming systems need to be analyzed and removed. Advantages in economics, environmental and soil-quality aspects over conventional farming systems have also been evaluated. CA holds tremendous potential for all sizes of farms and agro-ecological systems. This Special Issue intends to cover recent progress in different aspects related to the implementation of CA in a wide range of cropping systems across different agro-ecologies in the Mediterranean area.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
