Special Issue

Smart Farming Technology in Cereal Production

Message from the Guest Editors

The growing global demand for cereals, coupled with increasing environmental constraints and limited natural resources, necessitates the adoption of innovative, technology-based solutions in agricultural systems. In this context, smart farming represents a transformative approach to cereal production, integrating digital technologies, data-driven decision-making, and automation to enhance productivity, efficiency, and sustainability. This Special Issue, "Smart Farming Technology in Cereal Production", invites original research articles, comprehensive reviews, and applied case studies that examine the development, implementation, and impact of advanced technologies in the cultivation and management of cereal crops. We seek contributions that critically assess how smart farming techniques—including precision agriculture, remote sensing, sensor networks, robotics, and artificial intelligence—can improve input efficiency, reduce environmental impacts, and increase the resilience of cereal-based systems to climate variability. Submissions are encouraged from a wide range of disciplines, including agronomy, agricultural engineering, computer science, and environmental science.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
