Special Issue

Latest Research on Agricultural Waste Management

Message from the Guest Editor

With the recent focus on the circular economy, waste management has received much attention, leading to improved management technologies, strategies, procedures, and policies. Nonetheless, the complexity of waste means that management and policy decisions depend on the waste type, the composition of precursor substrate, available technology, and environmental impact. Thus, we seek new findings through cuttingedge research that have contributed effectively to turning solid and liquid wastes into value-added products. This also includes quantifying and harnessing special wastes (e.g., medical), including innovative waste recovery, recycling, and reuse approaches. This Special Issue will focus on solid and liquid waste management technologies, cost and environmental impact assessment, adapting precision agriculture in waste management and application, and related policy formulation.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
