

## Special Issue

# Beyond Agriculture 4.0: Design and Development of Modern Agricultural Machines and Production Systems

### Message from the Guest Editors

An increase in production efficiency cannot take place by destroying the natural resources of farmland. As a consequence, it became necessary to develop machines that would be able to carry out agrotechnical treatments dedicated to individual plants. In this context, a very important role is the design and development of new equipment and technologies to support farmers with state-of-the-art solutions that include automation elements, sensors, information systems and real-time calculation of thresholds, design, low energy consumption, better working conditions for the operator, lower losses in the process, etc. This special edition focuses on the role that the synergistic interaction of classic mechanical systems with mechatronic and data management systems can play in increasing the productivity of agriculture while reducing its impact on the natural environment. In view of the above, highly interdisciplinary quality studies and research are encouraged in areas such as: agriculture, engineering design, simulation and modeling, mechatronics, autonomous vehicles, post harvesting systems, environment, and prevention of injury/health risks for the operator.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

---

### Editor-in-Chief

Prof. Dr. Les Copeland  
Sydney Institute of Agriculture, School of Life and Environmental  
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
