

## Special Issue

# Soil Amendments Addition Affecting Soil Physical and Chemical Properties

### Message from the Guest Editors

Soil degradation threatens food production and constitutes a serious problem worldwide. Conversely, ameliorating degradation and improving soil properties via the selection of appropriate soil amendments are methods of increasing agricultural production. This Special Issue focuses on the impact of soil amendments on the physical and chemical properties of soil. The studies we present examine how various amendments can alter soil organic matter, soil carbon, soil water holding capacity, soil bulk density, soil nutrient availability, and overall soil health. Overall, this Issue offers valuable insights into the complex relationships between soil amendments and soil physical and chemical properties, paving the way for the development of more effective soil management strategies in the future. As such, this publication is open to high-quality articles in the fields of agriculture and soil science, including plant science and environmental management studies. We are particularly eager to publish articles and reviews that represent original research.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
