

## Special Issue

# Sustainable Production of Horticultural Crops

### Message from the Guest Editors

Sustainable agricultural production is expected to effectively manage natural resources to produce a sufficient amount of nutritionally valuable food, while maximizing the preservation of biodiversity and environmental quality and ensuring economic sustainability. However, in addition to ensuring a balance in food production and environmental protection, many challenges of agricultural production are also related to increasingly pronounced climate change. Sustainable and innovative agricultural practices in the production of vegetables, fruits, grapes, ornamental, aromatic, and medicinal plants can increase resource use efficiency, improve adaptability and abiotic/biotic stress tolerance, and enhance soil biodiversity while reducing production inputs. This Special Issue will cover a various research manuscripts aimed at highlighting various sustainable practices in the production of different horticultural crops and the positive impact on overall sustainability. Therefore, you are welcome to share your scientific achievements and contribute to our common goal of sustainable development of the agricultural system.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
