## **Special Issue**

# Application of Novel Approaches for Prediction, Detection, and Prevention of Animal Anomalies in Livestock Facilities

#### Message from the Guest Editors

This Special Issue aims to attract novel and original contributions to the analysis, study, and proposal of innovative techniques applied to the prediction, detection, and prevention of animal anomalies, e.g., precision indoor environment control, automatic monitoring of animal behavior and stress, remote disease diagnosis, and environmental hazard emission control, helping to improve the living conditions of animals, optimizing the use of non-renewable resources, and providing a positive social and environmental impact.

#### **About the Journal**

#### Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

#### Editor-in-Chief

#### Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
