

Special Issue

Strategies for Resource Extraction from Agricultural Products

Message from the Guest Editors

The Special Issue, titled "Strategies for Resource Extraction from Agricultural Products," focuses on innovative approaches to extracting resources from agricultural products. We anticipate that the articles presented will not only showcase strategies for extracting agricultural resources but also demonstrate modern processing techniques, including the drying of agricultural products. Special attention will be given to the impact of these processes on the quality and sensory aspects of the final products. Key areas of interest include sustainable agriculture, advanced extraction technologies, and food chemistry. The editorial team aims to promote approaches based on bioeconomy, emphasizing the added value of processed agricultural materials. The unique contribution of this edition lies in the analysis of the ecological aspects of extraction and processing processes, underscoring their role in the context of sustainable development. This edition serves as a valuable source of information for scientists and professionals engaged in modern resource extraction strategies, food chemistry, and agricultural product processing technologies.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
