

## Special Issue

# Agricultural Policies toward Sustainable Farm Development

### Message from the Guest Editors

Sustainable farm development is a pivotal force to address the pressing challenges of food security, environmental pollution, climate change, and biodiversity loss. Promoting sustainable farm development is the main content of Sustainable Development Goals and is imperative to ensuring the harmonious coexistence of agricultural growth and environmental preservation. Agricultural policy plays a vital role in driving sustainable farm development. Well-designed policies can provide incentives for farmers to adopt sustainable practices, such as offering subsidies for organic certification or promoting the use of renewable energy sources in agriculture. Moreover, agricultural policies can facilitate the dissemination of knowledge and best practices through training programs and extension services, empowering farmers to make informed decisions and implement sustainable farming methods. Policy interventions can also address market failures and ensure fair pricing mechanisms, which can incentivize farmers to invest in sustainable practices without compromising their economic viability.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
