

Special Issue

Agricultural Economics and Food Policy: New Perspectives in a Changing World

Message from the Guest Editors

In recent years, the world has faced dramatic changes due to a period of multiple crises, including climate change, the COVID-19 pandemic, and the Russian–Ukrainian war. Although different, these crises share common characteristics and effects that call into question food safety and security, the economic efficiency of farms, the development of rural space, the development of short food supply chains, agri-food supply chains, the sustainability of agricultural systems and the achievement of the objectives assumed by agricultural policies. For this Special Issue, we invite submissions addressing various aspects of the interface between agriculture and food systems under pressure from the climate change crisis, the COVID-19 crisis, and the Russian–Ukrainian conflict. This Special Issue aims to publish high-quality theoretical or empirical research papers that highlight the impact of the current crises on the agri-food economy and agricultural policies. International or country-specific research is welcomed.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
