The Human Dimension in Animal Health Programs: Understanding Behavior and Practices

Message from the Guest Editor

Human behavior directly influences animal health, making humans responsible for providing care, implementing preventive measures, and managing livestock systems. Recognizing the importance of human behavior in animal health programs can lead to targeted education, training, and increased awareness of proper animal husbandry. Effective communication and collaboration among stakeholders such as farmers, veterinarians, policymakers, and consumers are vital for success. Considering perspectives, needs, and concerns of involved parties allows programs to be tailored to address specific challenges. Understanding and addressing human behavior, fostering collaboration among stakeholders, and considering public health implications are essential for effective animal health promotion and societal well-being. This Special Issue explores studies assessing the human dimension, including practices associated with animal health programs, to enhance effectiveness and improve community health. We encourage observational studies addressing behaviors, knowledge, and opinions of stakeholders.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
