

Special Issue

Advances in Sustainable Agritourism Development

Message from the Guest Editors

Agritourism combines elements of agriculture and tourism, providing additional income streams for farmers and rural communities. This diversification of rural economies can help mitigate rural–urban migration, reduce poverty and enhance the quality of life for rural communities, while encouraging the preservation of farming, promoting sustainable agricultural practices and contributing to the overall resilience of food systems. Agritourism is typically associated with practices and farms of pre-industrial agriculture, rendering many farms unsuitable for participating. Agritourism activities offer opportunities for the public to engage with agriculture, learn about food production processes and develop a better understanding of where their food comes from. This Special Issue delves into the intersection of agriculture and tourism, focusing on innovative approaches that foster sustainable growth in both sectors, but also with conflicts and negative impacts. The Special Issue invites a diverse range of paper submissions, including empirical research, insightful case studies, conceptual frameworks and incisive policy analyses.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
