

Special Issue

Reconnecting People with Nature through Agriculture

Message from the Guest Editors

This Special Issue aims to highlight impactful research and commentary focusing on attempts to connect people with nature for the promotion of sustainable agricultural transitions. This Issue will fully embrace inter- and trans-disciplinary studies from multiple disciplines (e.g., agricultural sciences, environmental sciences, geography, economy, and sociology), as well as those incorporating other knowledge systems (e.g., local and indigenous) in the co-construction of knowledge for sustainable agriculture. In addition, we encourage studies in rural areas (e.g., GIAHS or HNV farmland) and initiatives addressing urban–rural relationships or those developed within metropolitan areas (e.g., community-supported agriculture, food hubs, domestic gardens, multifunctional agriculture, and farmers' or consumers' cooperatives). Studies assessing the societal and ecological impacts of those initiatives are also welcome. This Special Issue invites all types of articles, applying qualitative, quantitative, or mixed methodologies, as well as both empirical primary research and reviews, along with commentaries.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
