

## Special Issue

# Sustainable Pest Management in Agriculture

### Message from the Guest Editor

Integrated pest management includes the development of diverse ways of combining complementary approaches to manage pests by promoting the use of natural molecules and micro- or macro-organisms alone or in combination to elicit direct entomotoxic effects in pests without having an impact on non-target species. In this context, pest management through behavioral changes but also entomophagous beneficials can lead to attraction and kill and/or push–pull alternatives in multitrophic interactive ways either by using semiochemical releasers, by including odor-emitting plants, or according to intercropping/mixing crops. Interactions between soil, plant, and insect increasingly have to consider associated microbiota from each with promising applications such as crop defense elicitation by rhizobacteria or endophytic fungi. This Special Issue of *Agriculture* will include original research articles and mini-reviews focusing on the latest developments in the sustainable control of various agricultural pests, considering the effect of a diversity of strategies and approaches and enhancing different trophic interactions for new applications in crop fields.

### Guest Editor

Prof. Dr. Frédéric Francis

Laboratory of Functional and Evolutionary Entomology, Gembloux Agro-Bio Tech, University of Liège, 25030 Gembloux, Belgium

### Deadline for manuscript submissions

closed (15 November 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
