

Special Issue

Pesticides in Agriculture System

Message from the Guest Editor

Pesticides are used worldwide to manage agricultural pests with the significant benefits of increased food production, increased profits for farmers, and the prevention of human diseases. They are considered a major tool of conventional agriculture because pests consume or harm a large portion of agricultural crops and, without the use of pesticides, it is likely that pests would consume a much higher percentage. For this Special Issue on “Pesticides in Agriculture”, we are ready to accept papers that enhance our understanding of the role of the safe use of pesticides in current agricultural practice and discuss opportunities for new pesticides with increased safety profiles. Papers that fall along the continuum of pesticide use will be considered.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
