

Special Issue

Agricultural Markets and Agrifood Supply Chains

Message from the Guest Editors

In this era of globalization, climate change, evolving consumer preferences, and technological breakthroughs, the dynamics of agricultural markets and supply chains have undergone significant transformations. This Special Issue, entitled *Agricultural Markets and Agrifood Supply Chains*, will act as an important platform for the exchange of research and insights in this area. Agricultural markets and agri-food supply chains represent the backbone of global food systems. They include a range of activities, from farm to fork, involving farmers, processors, distributors, retailers, policymakers, and consumers. The effectiveness, efficiency, resilience, and sustainability of these systems have major implications for food supply sufficiency, food security, and, in a broader context, economic development and sustainability, including not only economic but also social and environmental aspects. This Special Issue aims to promote a deeper understanding of the complex relationships between market forces, supply chain management, policy frameworks, and the various stakeholders involved in the production and distribution of agri-food products.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
