

## Special Issue

# Exploring Sustainable Strategies That Control Fungal Plant Diseases

### Message from the Guest Editors

As the world moves towards sustainable agriculture, the control of fungi that cause plant diseases remains a major challenge, affecting agricultural yield losses, food security, and ecosystem health. Traditional control methods, often reliant on chemical fungicides, face issues of sustainability, human health risks, and the development of resistance in target fungi. There is a growing need to move towards more environmentally friendly and sustainable management practices. This Special Issue focuses on exploring sustainable strategies for the management of fungal plant diseases. It aims to enhance our understanding of how biocontrol innovations, the genetic enhancement of plant resistance, and sustainable agricultural practices can converge to form integrated and enduring solutions. This Special Issue will include interdisciplinary studies that bridge phytopathology with molecular biology, ecology, agronomy, and other relevant disciplines.

### Guest Editors

Dr. Inmaculada Izquierdo-Bueno

Microbiology Laboratory, Department of Biomedicine, Biotechnology and Public Health, Faculty of Marine and Environmental Sciences, University of Cádiz, 11510 Puerto Real, Spain

Dr. Javier Moraga

Laboratorio de Microbiología, Departamento de Biomedicina, Biotecnología y Salud Pública, Facultad de Ciencias del Mar y Ambientales, Universidad de Cádiz, 11510 Puerto Real, Spain

### Deadline for manuscript submissions

15 December 2025

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
