

Special Issue

Sustainable Viticulture

Message from the Guest Editor

The viticulture (and in turn the wine sector) is a relevant agricultural industry, nowadays threatened by several environmental and economic constraints. Hence, the improvement and progress of the viticulture industry might help one to face these constraints, ensuring economic viability and natural resources conservation. This Special Issue aims to be an updated knowledge platform addressing the environmental and socio-economic components of sustainability. Researchers are warmly invited to submit research covering (but not limited to) vineyard establishment and management, grapevine ecophysiology, and economics. Contributions are expected to report on soil fertility, training systems and canopy optimization, soil–climate–rootstock–variety interactions, precision farming, ecology, irrigation and mineral nutrition, plant protection, water relation and abiotic/biotic stress physiology, yield and grape quality, and root–soil organism interactions.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
