

Special Issue

Dairy Cow Nutrition and Milk Quality—2nd Edition

Message from the Guest Editors

During the COVID-19 pandemic, milk products became increasingly important for enhancing human health. There is a high demand for the improvement and evaluation of milk quality and animal welfare. The application of modern molecular technology in assessing dairy cow nutrition and milk quality will help to uncover the metabolic mechanisms in animal, milk, and human health functions. It will improve our understanding of milk not only as a source of normal dietary nutrients but also as a source of bioactive compounds with direct human health benefits. Therefore, this Special Issue will publish papers on dairy cow nutrition and feeding, milk quality and safety, and bioactive compounds present in milk and their benefits for human health. It welcomes high-quality interdisciplinary studies pertaining to dairy animal husbandry and milk production. Original research articles and reviews will be accepted.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
