

Special Issue

Agricultural Food Consumption, Public Policy, and Farm Household Economics

Message from the Guest Editors

The ability to ensure farm household wellbeing has been a longstanding policy objective for agricultural policies. Over the past few decades, farm production practices and the objectives of agricultural policies have changed to cope with the changing world. New technology, such as digital economy, has emerged into everyday life. On the other hand, different measures of farm household wellbeing, such as happiness and life satisfaction, have been proposed. Therefore, a better understanding of farm household wellbeing, food consumption, and agricultural policy is required. In this SI, we welcome submissions that address advancements in our knowledge of food consumption, agricultural policy, and farm household wellbeing. Both theoretical and empirical papers with novel contributions are welcome. Manuscripts that accommodate new concepts in emerging economy and technology, such as digital economy, big data, net zero, etc., are particularly welcome. This type of manuscript will be prioritized in the opportunity to be published. Empirical studies need to include a solid statistical analysis. Papers with simple descriptive analyses are unlikely to be published.
