

## Special Issue

# Nondestructive Testing and Intelligent Processing for Agricultural Products

### Message from the Guest Editors

Non-destructive testing technology refers to the use of light, sound, electricity, magnetic and other technologies to detect the physical and chemical properties of the sample without damaging the properties of the sample to be tested. This Special Issue focuses on the development of nondestructive testing methods and equipment for agricultural products, as well as intelligent processing methods for agricultural products based on nondestructive testing technology. This Special Issue on nondestructive testing technology will include interdisciplinary studies embracing agriculture with disciplines of biology, chemistry, physics and mathematics and engineering. Research articles will cover a broad range of agricultural products, including vegetable, fruits, cereals, livestock and poultry, aquatic products, crops, etc. All types of articles, such as original research, opinions, and reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
