

Special Issue

Advanced Research on Agroecological Weed Management

Message from the Guest Editors

Agroecology is one of the most rapidly developing scientific disciplines worldwide. It has the potential to introduce sustainability and protect agroecosystems, local communities, and value chains from climate change, biodiversity loss, and biological invasions. Combined with the need to find alternatives for weed management, agroecological weed management is the vision for enhancing agroecological transitions, reducing chemical inputs, and protecting nature. This Special Issue (SI) aims to gather reliable information and experiences from around the world on agroecological transitions and sustainable weed management based on agroecological approaches. The SI is open to research articles, opinions, reviews, and perspectives.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
