Special Issue

Advanced Research on Agroecological Weed Management

Message from the Guest Editors

Agroecology is one of the most rapidly developing scientific disciplines worldwide. It has the potential to introduce sustainability and protect agroecosystems, local communities, and value chains from climate change, biodiversity loss, and biological invasions. Combined with the need to find alternatives for weed management, agroecological weed management is the vision for enhancing agroecological transitions, reducing chemical inputs, and protecting nature. This Special Issue (SI) aims to gather reliable information and experiences from around the world on agroecological transitions and sustainable weed management based on agroecological approaches. The SI is open to research articles, opinions, reviews, and perspectives.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
