

## Special Issue

# Ecosystem Management of Grasslands

### Message from the Guest Editor

Grassland ecosystems play a vital role in biodiversity maintenance, soil conservation, and water resource management. With the increasingly serious global environmental problems, the research and practice of grassland ecological management has become particularly urgent. This Special Issue aims to discuss the latest progress and cutting-edge technologies of grassland ecological management and provide a platform for academic exchanges in this field. The purpose of this Special Issue is to promote academic research and exchange in the field of grassland ecological management and to explore the sustainable management methods of grassland ecosystems in depth. We welcome research papers on grazing management, vegetation restoration, biodiversity conservation, climate change adaptation, and more. Other topics of interest include but are not limited to the following articles: grassland ecosystem stability research; new grassland ecological management technology; carbon cycle and greenhouse gas emissions in grassland ecosystem; and the response mechanism of grassland ecosystem to climate change.

### Guest Editor

Prof. Dr. Zhenggang Guo

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.
