

Special Issue

Ecosystem Management of Grasslands

Message from the Guest Editor

Grassland ecosystems play a vital role in biodiversity maintenance, soil conservation, and water resource management. With the increasingly serious global environmental problems, the research and practice of grassland ecological management has become particularly urgent. This Special Issue aims to discuss the latest progress and cutting-edge technologies of grassland ecological management and provide a platform for academic exchanges in this field. The purpose of this Special Issue is to promote academic research and exchange in the field of grassland ecological management and to explore the sustainable management methods of grassland ecosystems in depth. We welcome research papers on grazing management, vegetation restoration, biodiversity conservation, climate change adaptation, and more. Other topics of interest include but are not limited to the following articles: grassland ecosystem stability research; new grassland ecological management technology; carbon cycle and greenhouse gas emissions in grassland ecosystem; and the response mechanism of grassland ecosystem to climate change.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
