

Special Issue

Seed Storage, Conservation and Longevity

Message from the Guest Editors

A Special Issue of *Agriculture* is going to be released in the second half of 2023, devoted to seed storage and longevity. The subject is extremely pertinent these days, in the times of accelerating climate change, declining biodiversity, political and economic conflicts, and the rapidly expanding range of available research methods. We are pleased to invite you to submit the results of your discoveries to share them with the readers of our journal. *Agriculture* is an international, scientific peer-reviewed open access journal published monthly online by MDPI. The Special Issue announced here will provide a platform for presenting recent developments in areas spanning the following subjects: the effects of biotic and abiotic factors on seed storage, vigor, and viability assessments, seed biochemical composition and its changes during storage, genetic determinants of seed storability, seed aging manifestations in various cell compartments, and seed banks. Original research articles and reviews are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
