

## Special Issue

# Advances in Agricultural Engineering Technologies and Application

### Message from the Guest Editors

Dear Colleagues Technology adaptation in the agriculture sector is crucial to ensure food security and poverty alleviation which are the primary themes of the UN-SDGs. Researchers and engineers are expected to address various challenges toward introducing innovative techniques, frameworks, and instruments, by which sustainable agriculture and food security can be satisfied. Worldwide, agricultural mechanization and modernization can be attained with advancements in agricultural engineering technologies and associated applications. Such advances are needed in the 21st century, particularly from the viewpoint of the agricultural water–energy–food security nexus. This Special Issue will comprise original research, reviews, and case studies outlining recent progress in agricultural automation and robotics; precision agriculture; high-efficiency irrigation systems; farm energy systems; storage, and processing of agricultural products; livestock and poultry sheds; wastewater management; biomass, biogas, and biochar; remote sensing and geographical studies.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

---

### Editor-in-Chief

Prof. Dr. Les Copeland  
Sydney Institute of Agriculture, School of Life and Environmental  
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), GEOBASE, PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
