Efficient Utilization of Biomass Resources in Agriculture

Message from the Guest Editor

Agricultural waste production exceeds hundreds of megatons per year worldwide, which is disposed of as waste or burned. Meanwhile, air pollution and intensifying climate change have become serious threats to humans and their surrounding environment, becoming a source of significant concern among researchers. There are numerous technologies for reusing agricultural waste, but almost all of them have inevitable shortcomings in actual application. Finding reasonable and efficient methods for efficient utilization of biomass resources in agriculture is urgently needed. Taking into account the importance of efficient biomass resources utilization worldwide, the purpose of the forthcoming Special Issue of *Agriculture* is to discuss the most important topics related to biomass, waste treatment, bioenergy, biotransformations and bioresource systems analysis, and technologies associated with conversion for agricultural biomass. Therefore, I would like cordially to invite you to submit your relevant papers to the incoming Special Issue of our journal.

Guest Editor

Prof. Dr. Dongyang Liu

College of Resources and Environmental Sciences, Nanjing Agricultural University, Nanjing, China

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
