Special Issue

Soil Quality and Health to Assess Agro-Ecosystems Services

Message from the Guest Editors

With human health being linked to soil health, the most evident thing that soils do for people is provide a basis for food production. However, other critical ecosystem services are provided by healthy soils to human health, including carbon sequestration, detoxification, water and nutrient retention, and maintaining biodiversity. As the of the Special Issue below, I would like to invite you to contribute with a paper regarding experimental studies on soil quality/health assessment in agricultural systems to evaluate ecological services beyond food production, promoting knowledge on sustainable agricultural management for natural resource maintenance and future progress of agroecosystems.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
