

## Special Issue

# Global Climate Change, Sustainability, and Challenges for Grape and Wine Production

### Message from the Guest Editors

The change in global climate in the current century is unquestionable. In most wine-growing regions, a critical rise in temperature and an increasing frequency of droughts have been observed, which may bring significant changes to the functional biodiversity of vineyard ecosystems and to grapevine behaviour and related yield and berry quality. Consequently, the predicted alterations in climate may have dramatic socioeconomic consequences in all wine-grape sectors, since wine quality is profoundly linked to the 'terroir' concept, which includes climate as one of its major determinants. Although grapevines show notable climate resilience, all wine-grape sectors must develop necessary adjustments, preferably focused on suitable and eco-friendly viticultural and oenological practices, to ensure well-balanced grape ripening and high-quality wine production.

### Guest Editors

Dr. José Manuel Moutinho Pereira

Centre for the Research and Technology of Agro-Environmental and Biological Sciences (CITAB), University of Trás-os-Montes e Alto Douro, Apt. 1013, 5001-801 Vila Real, Portugal

Prof. Dr. Javier J Cancela

GI-1716, Projects and Planification, Dpto. Ingeniería Agroforestal, Universidad de Santiago de Compostela, Escola Politécnica Superior de Enxeñaría, Rúa Benigno Ledo s/n, 27002 Lugo, Spain

### Deadline for manuscript submissions

closed (25 February 2023)

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
