Special Issue

Conservation Agriculture

Message from the Guest Editor

Conservation agriculture (CA) is an agro-ecological approach that aims to achieve sustainable and profitable intensification of agricultural systems through the application of three inter-linked principles, based on locally-formulated practices: Minimal soil disturbance, permanent soil cover, and crop rotations. The adoption of CA farming systems have demostrated tangible advantages in economics, environmental and soil quality aspects over conventional farming systems. CA holds tremendous potential for all sizes of farms and agroecological systems. This Special Issue intends to cover recent progress in different aspects related to the implementation of CA in a wide range of cropping systems across different agro-ecologies.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. Agriculture is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
