## Special Issue

## Conservation Tillage for Organic Farming

#### Message from the Guest Editor

Considerable research has been done on conservation tillage systems under organic or regenerative practices. Much of the published research has focused on field studies located in Europe and the USA. This important work has continued and been expanded to include efforts on other continents and in different countries as well. It is appropriate and timely to publish a Special Issue in *Agriculture*, which highlights the progress made in developing strategies for the successful adoption of conservation tillage practices by organic farming researchers and farmers. I invite those working in this area to submit manuscripts summarizing results of this research for this Special Issue.

### **About the Journal**

#### Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. Agriculture is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

#### Editor-in-Chief

#### Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
