

Special Issue

Crop Biofortification and Food Security

Message from the Guest Editor

In recent times many global drivers have diverted the attention of world communities fighting against hunger and food insecurity. It is challenging to achieve the targets of food security, especially in developing countries. Post COVID-19 challenges also enhance the threats to food security of poor resource countries. Besides global hunger “hidden hunger” has come up with the great potential to threaten food security, also affecting the human immune system. Changing living styles and reducing the nutritious value of staple foods are the main reason for this alarming issue. Crop biofortification has been considered an effective tool to combat micronutrient malnutrition for decades, especially in developing countries.

The purpose of this Special Issues is to highlight the recent research on biofortification, policy development to use the biofortification as a tool to combat malnutrition and to come up with further suggestions to expedite the biofortification eliminating all relevant concerns.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
