

Special Issue

Disease Management of Vegetables

Message from the Guest Editors

Vegetable production is affected by a broad range of plant diseases responsible for losses in yield and/or quality which directly affect profits and food security at household, national, and global levels. Vegetable farmers seek to increase the flexibility of their crop rotation and maximize profitability through improved disease control and crop judicious use of agrichemicals. The imperative to decrease crop loss in primary production is therefore urgent. In this Special Issue, we highlight recent advances in “Disease Management in Vegetables”. We welcome research delivering new science outcomes that translate directly to practical applications for farmers. This could include, but is not limited to, research into disease forecasting, integrated disease management, and cultural and chemical control. The research will be focused on ultimate goals of reducing crop loss and environmental impact, to improve economic, environmental, and resiliency indicators through enhanced disease management in vegetables.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
