

## Special Issue

# Improvement of Nutritional Utilization of Alternative Feed Ingredients in Pigs

### Message from the Guest Editor

Solving the contradiction between the rapidly developing pig industry and the increasingly scarce food resources is one of the most imperative challenges of modern agriculture. At present, alternative products of traditional corn-soybean meal feed such as wheat, brown rice, and yeast protein, etc. have been put on the agenda. However, a better understanding of how to eliminate the high fiber content and certain anti-nutritional factors in these products is critical to realize their feeding potential. This Special Issue focuses on improving the nutritional utilization of swine alternative feed ingredients, such as the development of methods to eliminate anti-nutritional factors in swine feed alternative products, and the use of a certain additive to increase the digestion of nutrients. These articles mainly cover areas such as the effects of physical processed, chemically processed, and biological fermented feed products in pigs. All types of articles, such as original research, opinions, and reviews are welcome

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
