

Special Issue

Agricultural Food Security and Economic Analysis

Message from the Guest Editor

Food security is a multifaceted issue that continues to receive much attention from researchers across the world. Food security affects rural and urban households, whether engaged in raising food or not. Among those affected are family farmers whose efforts are challenged by issues such as weather events, climate change, poor storage, input markets, lack of accurate price signals, and sales contract enforcement failure, to name a few. Furthermore, among farming households facing food insecurity are not only the ultra-poor subsistence farmers but those who participate in market exchanges, at least seasonally. Education, experience, access to extension services and current knowledge, and division of responsibilities within a family farm household also may influence household food security. The recent global COVID-19 pandemic has become a potential source of food insecurity to farm households that did not experience food shortage in the past. Those and related topics are of interest to this issue of *Agriculture*. This Special Issue invites submissions addressing these and other issues shaping food security across the world's farms and farming communities.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
