## Special Issue

# Agricultural Food Security and Economic Analysis

#### Message from the Guest Editor

Food security is a multifaceted issue that continues to receive much attention from researchers across the world. Food security affects rural and urban households, whether engaged in raising food or not. Among those affected are family farmers whose efforts are challenged by issues such as weather events, climate change, poor storage, input markets, lack of accurate price signals, and sales contract enforcement failure, to name a few. Furthermore, among farming households facing food insecurity are not only the ultra-poor subsistence farmers but those who participate in market exchanges, at least seasonally. Education, experience, access to extension services and current knowledge. and division of responsibilities within a family farm household also may influence household food security. The recent global COVID-19 pandemic has become a potential source of food insecurity to farm households that did not experience food shortage in the past. Those and related topics are of interest to this issue of Agriculture. This Special Issue invites submissions addressing these and other issues shaping food security across the world's farms and farming communities.

### **About the Journal**

#### Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

#### Editor-in-Chief

#### Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### **Journal Rank:**

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
