

Special Issue

Genetics, Genomics and Breeding of Rice

Message from the Guest Editors

Rice is a staple food for more than half of the world's population. Recent advances in genomics, genetics and breeding have highlighted the increase in nutrition use efficiency, abiotic stress resistance, grain production and quality in rice. It is necessary to promote research and the dissemination of results in this field. We are pleased to invite you to submit your research progress to *Agriculture*, a professional Q1 periodical in the "Agronomy" category, to be presented in this Special Issue on rice genomics, genetics and breeding. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: rice genetics, rice genome analysis and applications in rice breeding. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
