

## Special Issue

# Genomes, Molecular Breeding and Conservation of Bumblebee

### Message from the Guest Editor

Bumblebees are a group of pollinating insects comprising the genus *Bombus* (Hymenoptera: Apidae), which are excellent pollinators of greenhouse crops, decreasing the cost of labor and improving the yield and quality of the fruits. However, pathogen transmission, climate change, agrochemical exposure, and imported commercial species are threatening the pollination services of bumblebees. This Special Issue on “Genomes, Molecular Breeding and Conservation of Bumblebee” will highlight recent advances in our understanding of the interaction between bumblebees and their adverse environmental factors revealed by genome, transcriptome, physiology or behavior analysis. Research on the identification and rearing of local bumblebee species/subspecies for pollination services is also welcome. In this Special Issue, all types of manuscript, including Article, Brief Report, Communication and Review, are welcome.

### Guest Editor

Prof. Dr. Cheng Sun

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
