Agricultural Development Strategies for Less-Favoured Areas

Message from the Guest Editors

Less-favoured areas (LFAs) are commonly indicated as territories with different types of disadvantages, which can be limited from the perspective of development. Generally, LFAs are characterized by the significant presence of agriculture in land use even if frequent farming shows lower productivity and income. On the other hand, in these areas, agricultural practice produces relevant public services. The development of LFAs is strictly connected with the state of health of agriculture. At the same time, agricultural increase is not synonymous with the development of LFAs, and development policies should be promoted on a territorial and non-sectoral basis. This Special Issue intends to collect papers that propose criteria for the classification of the LFAs, considering the role played by agriculture and providing conceptual frameworks on LFAs, with additional reference to other territorial categories, analyzing the socio-economic performances of agriculture in these areas; measuring the impacts provided by public environmental and social services produced; and individuating adequate models, strategies, and policies for the development of the LFAs.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
