

## Special Issue

# Perennial Grains and Oilseeds: Current Status and Future Prospects

### Message from the Guest Editor

Perennial grains and oilseeds have become an active area of research world-wide. The release of cultivars in two species (perennial rice and intermediate wheatgrass) is the beginning of the realization of the potential of this broad research area. This has also led to agronomic research, food quality/food science, ecosystem services, and cropping system research into these potential crops alongside the continued breeding of the released crops and/or domestication of new crops. This Special Issue intends to highlight the scope, progress, and promise of current research into this expanding area of agricultural research. All types of original papers, such as original research articles and reviews, are welcome.

### Guest Editor

Dr. Douglas J. Cattani

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
