Application of New Technologies in Grain Storage and Processing: Challenges and Perspectives

Message from the Guest Editor

High-quality grain and processed products are basic requirements for our daily food. Application of new technologies in grain storage and processing can maintain high-quality food during grain storage, handling, transportation, and processing. However, application of new technologies always faces challenges, and also opportunities. This Special Issue focuses on the development, assessment, and application of new technology in grain storage, handling, transportation, and processing to efficiently enhance the quality of grain and processed products. Research and review articles covering a broad range of topics in this field are welcome.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, cross-disciplinary and scholarly journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. We invite submissions from authors according to the aims and scope of the journal described in more detail on this page. *Agriculture* is published in an open access format – articles are published on the journal's website immediately after acceptance, giving the scientific community and the public unlimited and free access to the content.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
