Special Issue

Improving Sustainability, Welfare, and Meat Quality in Livestock Production

Message from the Guest Editors

Meat is the most valuable source of highly digestible nutrients for people, and sustainable livestock production is the clue to sustainable food production. However, livestock housing systems have different potential when it comes to being sustainable and to offering animals a high level of welfare. Both the environmental conditions on the farm and the welfare of livestock will affect the performance of animals reared for meat, as well as the intrinsic meat quality attributes. Outdoor housing is related to increased exercise and a specific diet, in most cases with certain breeds or breed crosses. These kinds of housing systems have greater potential to produce high-quality meat, usually characterized by specific flavor and aroma. Some indoor systems also have the potential to offer a high level of welfare. However, aside from the influence of deepbedded housing on fattening performance, the effect on the quality of meat has not been proven. This Special Issue focuses on alternative, extensive animal husbandry practices that allow for the production of high-quality meat while maintaining high welfare standards and being in balance with the environment.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, scholarly and scientific open access journal publishing peer-reviewed research papers, review articles, communications and short notes that reflect the breadth and interdisciplinarity of agriculture.

Editor-in-Chief

Prof. Dr. Les Copeland

Sydney Institute of Agriculture, School of Life and Environmental Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
