Deadline for manuscript  
submissions:

**30 September 2022**

### **Message from the Guest Editors**

Dear Colleagues,

In this topical Special Issue, we would like to collect reviews and original research papers dealing with research and development of intelligent systems and their application in agriculture. The Special Issue covers almost all areas of agriculture, such as livestock farming, growing crops, technologies, landscape management, etc. Moreover, it includes topics in similar fields such as robotics, automatization, electronics, mechatronics, informatics or artificial intelligence. Therefore, papers focused on related methods such as machine learning, neural networks, machine vision, image processing, big data, IoT, remote sensing, sensors, and many others are also welcome.

For further reading, please visit the Special Issue [website](#).
