Message from the Guest Editor

Dear Colleagues,

The olive tree is a millenary species traditionally associated with the Mediterranean climate, although there is a growing interest in the installation of olive orchards in areas with a different climatology.

The development of modern fruit growing in the mid-20th century contributed to the intensification of olive cultivation. As a result, new olive groves appeared with higher planting density in soils of higher agricultural aptitude, giving rise to high-density olive orchards and more recently to hedge olive orchards.

This Special Issue aims to gather information produced by the scientific community working in the area of olive growing. Colleagues are invited to submit innovative papers contributing to the increase in knowledge aimed at technologies for new olive production systems.

For further reading, please visit the Special Issue [website](#).

Message from the Editor-in-Chief

AgriEngineering (ISSN 2624-7402) is an international open access, open-source, and cross-disciplinary scientific journal on the engineering science of agricultural and horticultural production. Our aim is to encourage scientists to publish their experimental and theoretical research, along with the full set of schematics, source-code, and mechanical design models leading to accelerated and rapid dissemination of leading-edge technologies emerging in agricultural, environmental, and agronomic engineering. *AgriEngineering* publishes articles, technical notes, reviews, commentaries, and case/field reports, as well as Special Issues on particular subjects.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [PubAg](#), [FSTA](#), [AGRIS](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Agricultural Engineering) / CiteScore - Q1 (Horticulture)
